(See Back Page)
High standards of workmanship and quality have always been a Carver tradition throughout their many years of exclusive boat manufacturing. Boats designed and constructed by master craftsmen bring you a superbly finished and up-to-date product, unexcelled for performance and years of carefree recreation.

Carver hulls are constructed of five ply, marine grade plywood with a plastic overlay to give you the finest and most durable finish available. A three piece laminated oak keel and solid oak ribs locked with bolt and nut brass fastenings give the rugged construction necessary to accommodate today's high performance motors.

Your family will enjoy the ease and convenience of a walk-through hatch when boarding or leaving your craft. Ample built in storage space for extra equipment stowage and maintenance free vinyl used to beautify and protect exposed areas add to the long list of Carver quality plus features.

To insure years of carefree boating every Carver hull is factory treated with a wood preservative solvent. This new process eliminates the possibility of discoloration and deterioration in the bilge and covered areas of the hull, and means that your boat will retain its strength season after season.

Your investment in a Carver boat can be expected to provide you total boating pleasure. You and your family will always have the security and safety of a naturally buoyant wood boat, along with the comfort and soft ride available with lapstrake construction.

Your authorized Carver Dealer will be happy to discuss your boating needs and recommend the Carver model to give complete satisfaction. Stop in and see him soon.

Inboard-Outboard
All Carver Boats, except 16 foot models, are available with inboard-outboard power. Consult your Carver price list for available power options.

All 17', 19', and 22' models include upholstered motor box and side seats as standard equipment.

Gas tank, battery, controls, instrument panel (as supplied by motor manufacturer), and mechanical steering are standard equipment on all inboard-outboards.

NOTICE
Manufacturer reserves the right to revise, change or modify construction of Carver Boats without notice.
