Every day, hundreds of talented people come together to build a product that they truly enjoy building. And in which they take enormous pride. They are the people at Carver, Colburne and designers, carpenters, electricians and engineers.

For more than 30 years, they have helped build some of the finest family cruisers afloat. Boats that perform as promised, that lavish their owners with comfort, and that consistently hold their value.

Carver is an independent company not a subsidiary of some non-marine conglomerate. Together, the company's owners and managers have decades of boatbuilding experience behind them. That expertise shows in every boat we build. In the classic, light fit of all our hatches and doors. In the flawless finish of the woodwork. In the stability of the hulls and the economical performance of the propulsion systems.

Virtually every component that goes into a Carver cruiser is made or assembled by our own people. The reason is simple: Since our name goes on our boats, we want full control over what goes into them. Maybe that makes us stubborn. But it also makes us better boats.

You can see our cruisers for yourself by visiting your nearest authorized Carver dealer. He's a hand-picked professional to whom you can lock for sound advice and superior service.

And if you'd like to see exactly how Carver cruisers are designed, built and tested — and meet the people who make it happen — simply call or write to arrange a personal tour of our facilities in Portage, Wisconsin. Our address and toll-free numbers are listed on the back of this brochure.

At Carver, our cruisers and our company are ready for your closest inspection.

3G MARINER

Our 3G Mariner is the perfect yacht for luxurious living and gracious entertaining. The bridge deck features a double sun lounge aft. The walk-around side decks give easy access to a second sun lounge on the foredeck, while the large cockpit aft boasts a convenient transom door.
