With three staterooms, two heads, one of the most spacious layouts in its class, offshore-tough construction, and a variety of unique design elements and amenities, the new C52 Command Bridge is one of the most exciting new model introductions in Carver’s venerable 60-plus year history.

This elegant yacht features a distinctive bow shape with raised sheerline, ensuring more available interior space, as well as more comfortable performance in offshore conditions. It offers easy access — from the walk-around side deck, to the wide-open cockpit, to the molded steps that ascend to the spacious bridge deck. Inside its 6-foot, 8-inches of headroom in the salon and 6-foot, 6-inches of headroom in the staterooms, provide an unparalleled level of live-aboard comfort.

What’s more, the C52’s hull, deck and superstructure feature both hand-laid and vacuum-infused structural and nonstructural fiberglass and core laminates bonded with infused epoxy resin for superior strength. Carver also incorporates fiberglass stringers for structural integrity and better performance, while its unique vacuum-infusion technology reduces unnecessary weight in the hull and dozens of component parts. Below the waterline, the hull bottom is bead-blasted to ensure optimal bonding with the sprayed-on antifouling paint, which creates an exceptionally smooth running surface.

No wonder Carver has the confidence to offer a transferable 2-5-10 Limited Warranty, which includes 2-year stem-to-stern warranty protection for all Carver systems, components and workmanship, 5-year gelcoat blister warranty protection, and 10-year structural warranty protection for the hull and deck. Ask your Carver dealer for warranty details and requirements.

The new C52 really does redefine the entire concept of luxury, space, and performance.
Large windows bathe the salon interior with natural light and ensure outstanding 360-degree views from the Skylounge seating area that’s also perfect for entertaining and relaxing with family. Thanks to luxurious fabrics, high-gloss cherry wood and carefully placed accent lighting, the C52 is warm and inviting for all who grace her interior.

With solid surface counter tops, stainless steel sink and appliances, all the conveniences of home are within easy reach in this well designed and appointed galley.

Fully opening glass doors and a flush threshold provide seamless integration of the salon and cockpit. With the fully equipped galley close at hand, no one is left out during hors d’oeuvre or meal preparation. The separate entrance to the full beam master stateroom is just off the galley and offers unprecedented owner privacy in a yacht of this size.
The C52 also incorporates a spacious third stateroom, located amidships to starboard, which can be fitted with an optional washer and dryer. It features comfortable twin bunks and convenient access to the port-side head.

**FORWARD STATEROOM**

Just a few steps down from the salon, the C52 offers a large forward stateroom with queen-size island berth. These accommodations offer a generous amount of locker storage and 6-foot 6-inch headroom. Several entertainment options are available. This beautifully appointed cabin also has its own access to the port-side head.

**GUEST HEAD**

The guest head, which also serves as the day head, is accessible from the forward stateroom, as well as from the companionway. It’s virtually the size of most master heads on similar sized yachts and features separate stall shower with teak seating surface.

**DISCERNING OWNERS WILL APPRECIATE THE SPACIOUS MID-SHIPS MASTER STATEROOM WITH ITS PRIVATE ENTRANCE AND IMPRESSIVE FULL-BEAM LAYOUT. THESE LUXURIOUS ACCOMMODATIONS ARE FLOODED WITH NATURAL LIGHT AND INCORPORATE A PLUSH QUEEN-SIZE ISLAND BERTH, PLENTY OF THOUGHTFULLY DESIGNED STORAGE SPACES, SEPARATE LOUNGE SEATING AND A LUXURIOUS EN-SUIT PRIVATE HEAD. MANY ENTERTAINMENT OPTIONS ARE AVAILABLE TO ENHANCE THE OWNERSHIP EXPERIENCE.**

**MASTER STATEROOM**

The master head is the personification of luxury itself. A separate stall shower features teak seating and a rain showerhead for a gentle, soothing experience.
