

30

Santego

The Carver 30 Santego offers contemporary styling in a low-profile command-bridge cruiser. A large cockpit leading to an integral fiberglass swim platform with ladder will delight the water sport enthusiast. A set of built-in fender racks is standard. The galley offers alcohol/electric stove

and dual-voltage refrigerator, while the head compartment comes complete with shower and vanity. Large private forward stateroom and dinette/lounge that converts to a double berth provide generous sleeping accommodations.

SPECIFICATIONS

LOH	30'8"
Standard LOA	34'0"
Maximum LOA	36'0"
Beam	11'0"
Draft	37"
Bridge Clearance	9'9"
With Optional Arch	10'0"
Deadrise at Transom	19°
Dry Weight (approx.)	11,150 lb.
Cabin Headroom	6'3"
Sleeping Capacity	5
Fuel System Capacity	150 gal.
Water System Capacity	57 gal.
Waste Capacity	37 gal.

Carver 30 Santego

Venturi windshield
Trim tabs
Fender racks (built-in)

Propulsion

Twin stern drive - gas
5.0LX MerCruiser
231 Volvo Duo-Prop
5.7L MerCruiser
AQ271 Volvo Duo-Prop
Twin stern drive - diesel
AQAD 41 Volvo Duo-Prop

Hull Design

The Carver 30' running bottom incorporates a modified V-warped plane design that features a sharp entry at the stem (forward) which cuts rough water for a soft ride. Four lifting strakes and wide, hard chines provide additional lift and stability.

Construction

Every Carver hull utilizes the "hand-layup" method of construction. This method assures proper resin saturation, consistent thickness of material, and removes the possibility of air voids. Glass to resin ratios are better maintained through this method thus assuring consistent laminate strength. (Each individual hull, deck and liner is thoroughly inspected and tested to insure Carver glass to resin ratio design specifications are met.)

Gel Coat - Fiberglass components used above the waterline are coated with at least an 18 mil thickness of gel coat. All underwater surfaces of the hull are coated with a minimum of 24 mils of gel coat.

Fiberglass Laminate - The 30' Carver hull utilizes a layup schedule that includes 1½ oz. chop strand glass and 24 oz. woven roving. Generous overlap of the individual laminates increases the thickness and strength in the areas of the keel and chines.

Deck Construction - The deck and superstructure are reinforced with ¾" end grain balsa. ¼" aluminum plates are utilized in areas of hardware installation. The deck is secured to the hull by a fiberglass adhesive and stainless steel screws every six inches along the gunwale. Heavy gunwale molding seals the deck/hull joint.

Carver prides itself on the fine workmanship that is found in each boat. Special attention is given to every detail, from the initial inspection of the hull to the hand finishing of the cabinetry. These special touches, combined with the dedication of our employees, are reflected in the pride of ownership of a Carver yacht.

Galley and Head Compartments

Alcohol/electric stove
Refrigerator
Head, with 37 gal. holding tank
Vanity
Pressure water system with shower
12 gal. water heater
Dry bar

Functional/Safety

Windows, lightly tinted, with screens
Horn, single-trumpet
Bilge pumps, automatic (2)
Gravity bilge ventilation
Galvanic isolator
Fireboy Halon fire extinguisher system
Carbon monoxide monitoring system
Shipping cradle

Electrical

Two marine-quality batteries
Cabin lighting, 12V
Dockside wiring, 30 amp, 120 VAC, with shore cord
Voltmeter/ammeter

Interior

Color-coordinated carpeting, draperies and upholstery
Dinette/lounge converts to double berth
