**Design**
- The 38 Aff cabin plan is easily modified by removing the main cabin area, the second deckhouse. This creates a unique, three-belted layout, i.e. the centerline of the hull, the lower deckhouse, and the upper deckhouse. This creates an additional 30% more storage capacity over the other models.

**Aluminum**
- Aluminum is used in areas of hardware construction. The deck is firmly bonded to the hull, with fiberglass adhesive and 84 sheets, and sealed by a foam gasket bonding. Every Carver boat is thoroughly inspected at each step of the construction process to guarantee it meets our demanding, high quality standards.
